"The Red Dot winners are pursuing the right design strategy. They have recognised that good design and economic success go hand in hand. The award by the critical Red Dot jury documents their high design quality and is indicative of their successful design policy."

Swedish design and quality since 1882

In your hand you hold Sievert's whole product range. But behind all the product pictures and article numbers there is a lot more.

This unseen Sievert represents more than hundredthirty years of technical progress - decades of technical support and discussions with users - years of providing thoughtful service - days of unceasing effort to find new possibilities.

Our stated goal is both simple and straightforward: to develop, manufacture and supply innovative and high-quality tools and tool systems for all types of soldering and heating applications.

This statement is not just a definition of our product range – it is also a promise. A promise that we will always be one step ahead and that we will always listen to you – our customer – and involve ourselves in your business. A promise that we will be close to hand wherever in the world you may be. A promise that we will be the working partner that you need, helping you achieve the greatest possible success in your business when you use our products and services. Whatever the jobs you may have on today. Whatever the jobs you may have in the future.

We have been in business for more than 130 years, and today our products lead the world. But it still seems that our work has only just begun. Welcome to Sievert.

The concept is over a hundred years old but the flame still burns as brightly today

Because Carl Richard Nyberg was a specialist in soldering, he knew all too well that the soldering technology available in the 1880's left a lot to be desired.

But C.R. Nyberg was a stubborn man determined to find a heating source that would make the work more efficient. After much experimentation at home in his little flat he succeeded in finding a solution and in 1882 he had the first prototype of his soldering blowtorch ready for use, for which he also obtained a patent.

In the same year, the future industrialist Max Sievert opened the doors of the machinery business in Stockholm that was to form the foundation of a major company. When the paths of Nyberg and Sievert later crossed, the partnership they created was uncommonly fruitful. Nyberg manufactured blowlamps and Sievert sold them throughout the world. A successful business was launched.

SIEVERT®

Our products represent today's most advanced technology

But our ambition extends far beyond this.

Wherever you are

Sievert has its origin and head office in Sweden, but with sales in more than 60 countries in five continents, it should be viewed as a truly global business. Few other companies in our industry can boast such geographical coverage.

Our geographical spread also has major benefits for our customers. One is our accessibility and the availability of high standards of service. Another is the experience that we gain of different countries and different industries, which is of immense benefit in our ongoing development work.

Whatever you need

Our goal is to be able to offer professional products at the top end of the quality scale for any possible type of soldering or heating task that needs to be done. Whether the job is large or small and whether you are a demanding professional user or a demanding Do-It-Yourselfer.

It is you that controls our work

These days it is not enough to do a good job. You must do the job better, more efficiently and if possible cheaper than anyone else. That is what counts today.

Accordingly, it is vital that we at Sievert understand how you and all our other customers operate – what your daily work involves. In this way we can become a better supplier, providing the products that will best meet the precise requirements of your individual business. In many cases we have modified products to match specific requests and these have then become part of our standard range of products. This is how you can – and should – control our work, because at the end of the day it is your work that really matters.

Quality means more than what you see

The piezoelectric igniter is guaranteed for 30,000 operations, and works faultlessly even if the handle is exposed to moisture. Every smallest detail is contrived and machined to function perfectly. We use the very best steel and the most advanced production technology.

Even so, Sievert quality means much more than reliable operation and a long working life. It means knowledge of the user's daily work and long experience of the industry. It means a worldwide organisation. It means the products and range of accessories that make up the whole Sievert System. All this comes as standard under what we mean by Quality.

World leaders - but we are never satisfied

"Anything good can be made even better" summarises the spirit of our day-to-day work. This doesn't mean that our current products are not as good as we can make them – rather, that we constantly improve our products to match the changing world outside. Being innovative requires more than undertaking technical development for its own sake; it means foreseeing future changes. A good example is our new electronic product range, which complements our established range to make us a complete supplier.

Cyclone flames. The rotating flames wrap around the pipes giving an even heat distribution. Ideal for brazing, soft soldering, plumbing etc.

Pin-point flames. Fine pointed flames with a distinct core. Ideal for fine work on gold, silver, lead etc.

Standard flames. Strong, powerful flames for general soldering and heating.

Power flames. Large powerful, windproof flames for efficient outdoor use. Ideal for roofing, road-working and large scale heating.

Hot-air flames. Powerful windproof hot-air streams. Ideal for paint stripping, heat shrinking, heating of PVC, roofing etc.

Soft flames. Sweeping, powerful flames with visible yellow tip. Ideal for cable work and heat shrinking.

Flat flames. Powerful and windproof wide flame. Ideal for paint stripping, ski waxing etc.

Promatic System

The universal torch system

SAFE

USER FRIENDLY

ERGONOMIC

Promatic is the most complete and advanced system in our range. The patented piezoelectric ignition, universal handle, range of accessories, advanced design and ergonomic appearance make Promatic a world-beating system for all possible heating tasks where efficiency and professional workmanship are the most important requirements.

Promatic - Sievert's top of the line torch system operates with propane and butane gases.

Sheet metal

- Plastic composite handle reinforced with 30% glass fibres for maximum durability
- Double moulded soft grip for highest comfort and usability
- Piezo ignition with instant trigger on/off function
- Bayonet fitting for burners
- Swivelling hose connection to avoid hose drag
- Combined suspension hook and footstand
- Valve for precise flame setting
- Delivered without hose nipple

Precise flame adjustment valve

No gas emission unless burner fitted. Bayonet fitted burners.

Ergonomic softgrip handle

Promatic System

Burners

Soft flame burners for cable shrinking

System

- Soft flame design ideal for cable work and other heat shrinking applications
- Soft flame burners with sweeping, powerful yellow and blue soot-free windproof flames
- Fresh air sucks in and keeps the burner head cold to minimize the risk of burning the shrink material
- To heat the sleeves efficiently but still soft enough not to overheat the shrink material
- Working pressure 2 bar

Soft flame burner no.	334791	334191	334891
Burner diameter Ø, mm	28	38	50
Gas Consumption, g/h at 2 bar	460	900	2 000
Effect, kW	5,9	11,5	26
For thick walled sleeves max, mm Also for thin walled sleeves	50	150	150

Burners for soft soldering, brazing and heating

Pin-point burners

System

- Pin-point burner with the finest flame for precision work such as gold and silver forging
- Silver soldering about 615°C
- Working pressure 2 bar

Pin-point burner no.	333301
Burner diameter Ø, mm	14
Gas Consumption, g/h at 2 bar	55
Effect, kW	0,7
Soft Soldering about 400°C max. pipe diameter Ø, mm	12

Standard burners

System

- Standard burners with brush-type flames for all kinds of soft soldering/small heating applications
- Silver soldering about 615°C
- Working pressure 2 bar

Standard burner no.	334301	334401
Burner diameter Ø, mm	19	25
Gas Consumption, g/h at 2 bar	250	580
Effect, kW	3,2	7,4
Soft Soldering about 400°C max. pipe diameter Ø, mm	32	70

Cyclone burners

System

Promatic

- Cyclone flame burners are the most efficient burners for brazing and soft soldering
- The rotating flame gives an even and all-round heat transfer to the pipe
- Working pressure 2 bar

Cyclone burner no.	334001	333501	333601
Burner diameter Ø, mm	14	19	25
Gas Consumption, g/h at 2 bar	170	250	580
Effect, kW	2,1	3,2	7,4
Soft Soldering about 400°C max. pipe diameter Ø, mm	28	32	70
Brazing up to 720°C max. pipe diameter Ø, mm	15	18	32

Hot-air burners

System

- Hot-air burners with powerful windproof hot-air streams for heat shrinking
- 33499 ideal for shrinking in confined spaces and fibre optic closures
- Working pressure 2 bar

Hot-air burner no.	333401	334990
Burner diameter Ø, mm	38	32x15
Gas Consumption, g/h at 2 bar	125	55
Effect, kW	1,6	0,7

Special burners for PVC and TPO

System

- Hot-air burners with powerful windproof hot-air streams for heating PVC or other rubber membranes where an open flame not is suitable
- Working pressure 2 bar

Hot-air burner no.	335890
Burner diameter Ø, mm	32x15
Gas Consumption, g/h at 2 bar	55
Effect, kW	0,7

Special burners for electronics

System

- Extra small hot-air burner incorporating a heat reflector, ideal for signal systems, traffic lights, alarm systems, marine applications, automobiles and other vehicle repairs
- Working pressure 2 bar

Hot-air burner no.	335990
Burner diameter Ø, mm	25
Gas Consumption, g/h at 2 bar	28
Effect, kW	0,36

Promatic System

Burners

Power burners for waterproofing and other heat demanding works

Power burners

System

- High capacity power burners with extremely strong and windproof flames for roofing works and for large-scale heating applications
- Long burners for field torching
- Recommended working pressure 4 bar

Field Power burner no.	335102	335402	335302
Burner diameter Ø, mm	50	60	60
Gas Consumption, g/h at 4 bar	6 700	8 000	8 000
Effect, kW	86	102	102
Burner length, mm	600	500	600

Power burners, titanium

Field Power burner no.	337302
Burner diameter Ø, mm	60
Gas Consumption, g/h at 4 bar	8 000
Effect, kW	102
Burner length, mm	600

Detail power burners

- Short burners for detail work on roofs and other heating applications such as preheating before welding and shrinking on pipelines
- Recommended working pressure 4 bar

Detail Power Burner no.	335002	335602
Burner diameter Ø, mm	40	60
Gas Consumption, g/h at 4 bar	3 350	8 000
Effect, kW	43,5	102
Burner length, mm	250	250

Soldering burners for electronics

Promatic

B

System

B

- Burner with encased and windproof flame for soft soldering.
- Ideal for signal systems, traffic lights, alarm systems, marine applications, automobiles and other vehicle repairs
- Working pressure 2 bar

Soldering burner no.	335991
Soldering tip diameter Ø, mm	10
Gas Consumption, g/h at 2 bar	28
Effect, kW	0,36

Burners for paint stripping

System

B

- Flat flame burner with powerful wide flame for efficient use outdoors for paint stripping and ski-waxing
- Working pressure 2 bar

Flat flame burner no.	334501
Burner diameter, mm	40x8
Gas Consumption, g/h at 2 bar	215
Effect, kW	2,7

Soldering iron burner head

System

B

- Titanium burner head to turn your Promatic handle into a high performance Soldering Iron
- Incorporates an effective windshield that makes the flame totally encased and windproof
- Working pressure 2 bar

Soldering iron no.	700301
Gas Consumption, g/h at 2 bar	140
Effect, kW	1,8
Weight, g	542

Promatic System

Accessories

Copper bit

Made of copper with one pointed and one flat end. For pin-point burner 3333.

Copper bit no.	884301
----------------	--------

Flat nozzle

Flame shaper for hot-air burner 3334.

Flat nozzle no.	716941
-----------------	--------

Neck tube support

Neck tube support / Footstand for burners with long neck tubes.

Neck tube support no.	717241
-----------------------	--------

Tool box

Made of sturdy metal-reinforced plywood. With large handle and locking clasp. 720106: Space for up to 5 burners, 4 m hose, handle, regulator and two disposable cartridges.

Tool box no.	720106
Dimensions:	260x160x350 mm

Soldering mat

For wall and floor protection when soldering. Saves heat and time. For temperatures up to 760°C.

Solder mat no.	415061
Dimensions:	25x25 cm

Tool bags

Pro 86 System

The classic torch

STABLE FLAME

RELIABLE

The Pro 86 series meets high criteria for carrying out professional heating tasks. Whether soldering, paint stripping, shrinking or performing gold/silversmith's work, the high quality combined with convenience and a comprehensive range of accessories makes the Pro series a versatile tool for the demanding craftsman.

Sheet metal

- Single valved handle mainly for smaller burners
- The spindle and valve are designed to give a very exact and quick flame setting
- The springloaded metal knob gives a precise and stable setting for the finest of flames
- All metal parts made of high quality brass
- Ergonomically designed plastic composite handle
- Double moulded soft grip for highest comfort and useability
- Delivered without hose nipple

Pro 86 System

Burners and neck tubes

Sievert Pro neck tubes

- Neck tubes made of high quality brass
- Shorter neck tubes are recommended for smaller heating applications like gold and silver forging

Neck tube no.	Length, mm
350902 with hook	180
350501	100
351102 with hook	70
350101 only for burner 8842	78

Soft flame burners

- Soft flame design ideal for cable work and other heat shrinking applications
- Soft flame burners with sweeping, powerful yellow and blue soot-free windproof flames
- Fresh air sucks in and keeps the burner head cold to minimize the risk of burning the shrink material
- To heat the sleeves efficiently but still soft enough not to overheat the shrink material
- For direct connection to Sievert Pro handles
- Working pressure 2 bar

Soft flame burner no.	352890	352990
Burner diameter Ø, mm	28	38
Gas Consumption, g/h at 2 bar	900	1 200
Effect, kW	11,3	15

Pin-point burners

- Pin-point burners with the finest flames for precision work such as gold and silver forging
- Silver soldering about 615°C
- For connection to Sievert Pro necktubes, 8842 only for necktube 3501
- Recommended working pressure 2 bar

Pin-point burner no.	884204	393802	393902
Burner diameter Ø, mm	8	17	17
Gas Consumption, g/h at 2 bar	20	20	70
Effect, kW	0,25	0,25	0,9
Soft Soldering about 400°C max. pipe diameter Ø, mm	8	10	12

Standard burners

System

394002

394102

294102

Pro 86

- Standard burners with brush-type flames for all kinds of soft soldering/small heating applications
- Silver soldering about 615°C
- For connection to Sievert Pro necktubes
- Recommended working pressure 2 bar

Standard burner no.	394002	394102	294102
Burner diameter Ø, mm	17	22	28
Gas Consumption, g/h at 2 bar	90	240	600
Effect, kW	1,2	3,1	7,7
Soft Soldering about 400°C max. pipe diameter Ø, mm	12	40	60

Cyclone burners

System

352403

352503

- Cyclone flame burners are the most efficient burners for brazing and soft soldering
- The rotating flame gives an even and all-round heat transfer to the pipe
- For direct connection to Sievert Pro handles
- Working pressure 2 bar

Cyclone burner no.	352403	352503
Burner diameter Ø, mm	19	25
Gas Consumption, g/h at 2 bar	240	800
Effect, kW	3,1	10,3
Soft Soldering about 400°C max. pipe diameter Ø, mm	50	70
Brazing up to 720°C max. pipe diameter Ø, mm	18	32

Special burners

Burners for paint stripping

System

- Flat, wide, extremely windproof and powerful flame for paint stripping
- For direct connection to Sievert Pro handles
- Recommended working pressure 2 bar

Flat flame burner no.	351703
Burner diameter, mm	35x5
Gas Consumption, g/h at 2 bar	210
Effect, kW	2,7

Soldering iron burner head

System

295501

708121

- Burner head to turn your Pro 86 handle into a high performance Soldering Iron for sheet metal work
- Windshield and burner designed to give excellent wind protection
- Working pressure 2 bar

Soldering burner no.	295501
Gas Consumption, g/h at 2 bar	260
Effect, kW	3,3
Wind shield no.	708121

Pro 88 System

Heavy-duty torch

HEATING POWER

PERFORMANCE

The Pro 88 series is used all over the world by professional roofers and waterproofing specialists. With a complete power burner programme, including Titanium torches, the Pro 88 is the ultimate torch system for heavy-duty works.

The Pro 88 series operates with propane and butane gases.

Precise flame adjustment of pilot and main flame

Pilot flame for gas saving

Double valved handle mainly for larger burners

Wide range of burners for power applications

Works in all weather conditions

Sievert has a wide range of titanium burners and necktubes

Pro 88 System

Burners and neck tubes

Sievert Pro neck tubes

▪ Wide range of neck tubes made of high quality brass ▪ Double neck tube 770044, made of stainless steel, makes it possible to connect two burners to one neck tube ▪ Shorter neck tubes like 3505 and 3509 are recommended for smaller heating applications like gold and silver forging ▪ Longer neck tubes like 3506, 3507, 3508, 3510 are recommended for larger jobs like roofing and road-work

Neck tube no.	Length, mm
350601	750
350801	600
350701	500
351001	350

Titanium range

Save Your body

Working long days in tough conditions requires tools that are easy to handle and that prevent state of exhaustion. Sievert Titanium torches are the most ergonomic roofing burners ever created. With weight reduced by 60% compared to traditional burners, they will dramatically reduce the load on your body when working continuously for hours, days and months.

Titanium power burners and kits

Power burners

System

- Heavy-duty light weight power burners with extremely strong and windproof flames to withstand the severest weather conditions
- Ideal for drying, bitumen laying, detail and field torching, preheating before welding, melting snow/ice and other heat demanding applications

Hot-air burners

Hot-air burners for roofing work

System

298101

- Powerful hot-air roofing burners with totally encased flames for efficient bitumen laying when open flames are not permitted
- Powerful enough to achieve the same speed of roof laying compared to open flames - and the gas consumption is much lower
- The use of heat is very efficient due to the narrow and directed hot-air stream and due to the fact that one can work even closer to the material
- All burners can use compressed air to increase power for welding and for quick and efficient drying
- Working pressure 2 and 4 bar

With lifting device.
Hot-air directed
obliquely under
overlap. Supplied
with 3488 handle.

3 LAYERS FOR SAFETY

Sievert high pressure hoses conform to the EN 559/ISO 3821 standards. Sievert hoses are also extra frost resistant and can be used in temperatures down to -30°C. The Sievert hose is designed with an inner layer of black gas resistant rubber, a middle layer of reinforcing weave to withstand high pressure and an outer orange coloured layer to protect against external damage, sunlight and ozone.

Sievert hoses are available with inside diameters of 5 mm, 6,3mm and 8 mm in 50 meter rolls or as factory fitted and leak tested hose kits.

Regulators

Hose failure valves

EXTRA SAFETY

STEADY PRESSURE

Sievert regulators are manufactured in brass to ensure the highest quality and long service life. The valves have a very high capacity and precise outlet pressure.

Why use a regulator?

Certain Pro 86/88 burners, such as cyclone burners and most Promatic burners, require a steady pressure of 2 bar in order to perform well. Other burners can also operate under higher pressures but it is still an advantage to reduce the pressure from the propane cylinder. The advantage is that the pressure can be stabilized to obtain the same pressure on a warm summer's day as on a cold winter's day. The diagram shows how the pressure in an LP-gas cylinder varies with temperature. If the gas output is high, the gas cylinder will be cooled down and the pressure will drop.

Why use a hose failure valve?

A hose failure valve improves safety by **cutting off the gas flow in case of a hose rupture or some other major gas leak**. The use of hose failure valves is especially recommended on long hoses. The hose connection rotate freely on the valve housing, which reduces the risk of the hose becoming entangled. Sievert hose failure valves are supplied separately (3054) or integrated in regulators (3063, 3083, 3092 and 3093).

Why use LTS?

The Leak Test System improves safety even further. The **LTS valve is designed to detect minor leaks**. Before starting work, the operator can check for leaks in the system with the LTS valve. Their use is especially **recommended in poorly ventilated premises and when working below ground**. A regulator with LTS is always combined with a hose failure valve, to take care of the risk from major leaks.

Safety

Disposable gas

Our filling of gas cartridges is controlled with the greatest of care. An automated weight control on the production line weighs each individual cartridge. The cartridge is then tested for leaks by immersing it in a 55°C water bath for three minutes. If the cartridge weighs too little or too much or if gas leaks out during the water test, it is automatically removed from the production line and discarded.

“The various safety steps in the process guarantee that each cartridge is of the highest quality and that it is completely safe for our customers to use,” “We know that we have unique safety solutions in our new factory and that we therefore always deliver the best products to our customers.”

MAPP® and Ultramapp gas - 2400°C

For soldering, brazing and heating applications

- Safer, faster, cheaper and easier to work with than Acetylene
- Not sensitive to shocks
- Environmentally friendly and non toxic gas mixture

NEW

Premium quality Propane - 1925°C

- Adapted to most soldering and brazing applications

Powerjet System

The professional torch

FLEXIBLE

PROFESSIONAL

RELIABLE

Flexibility is the key word to describe the Sievert hand held torch system. These blowtorches provide everything the craftsman or discerning home handyman requires. With many unique features, these are the most advanced blowtorches for brazing or soft soldering, heat-shrinking, heating and dismantling work.

This Sievert Torch System operates on a number of fuels from propane, butane, Propane/Butane mix, Sievert Ultragas (a highly efficient anti-flare mixture) and our MAPP® and Ultramapp for extreme high heat levels.

Powerjet System

The professional torch

- The most powerful and efficient torch system in the market
- The ergonomic handle is both long lasting and reliable
- Reliable Automatic Piezo ignition (up to 30000 ignitions)
- Trigger on/off function helps preventing LPG wastage
- Anti-Flare enables the torch to operate in all positions (360°)
- Full range of 6 easily interchangeable burners
- Easy exchange of nozzles
- Designed for use with MAPP® but also suitable for use with Propane, Ultramapp and Ultragas

Turbojet

Easy-to-use torch with swivel burner for hands-free work

NO FLARE-UP

360° SWIVEL

The lightest hand held torch on the market, yet the most powerful.

The new Turbojet is engineered with the craftsman in mind. The updated swivel burner is now providing 360 degrees of rotation in not one but two different places, making the places that are impossible to reach, possible.

All new aluminum body gives the Turbojet a unique design and makes it 50% lighter than its predecessor.

The new Turbojet is designed with passion and innovation, just like everything else at Sievert.

Handyjet

The new multi-purpose torch

Soldering

Heating

Paint stripping

Multi-purpose is the keyword for our new Handyjet line. Examples of applications are soldering, paint stripping, de-icing, cooking, barbeque and many other heating applications.

New unique burner

Our new Handyjet has a new powerful, efficient and windstable multi-purpose burner. The new unique burner is designed with a preheating tube, that heats up the gas before combustion. This means that our new Handyjet can be used upside down without any flare-ups.

Handyjet

HANDY

REFILLABLE

Pro torch 430000

- Gives a precise and adjustable flame ideal for cooking, lighting barbeques and candles also small soldering jobs
- Automatic ignition
- Complete portability
- Hi-tech polymer construction - light weight yet sturdy
- Flame temperature 1300°C
- Burning time per fill 60 min

Pro torch with rubber grip 432000

- Gives a stable and adjustable flame ideal for cooking, lighting barbeques and candles also small soldering and shrinking jobs
- Automatic ignition
- Complete portability
- Ergonomic handle with rubber grip
- Removable safety stand included
- Flame temperature 1300°C
- Burning time per fill 220 min

Pro torch heavy duty 435000

- Gives a powerful and adjustable flame ideal for cooking, lighting, melting/de-icing, soldering and shrinking jobs
- Automatic ignition
- Complete portability
- Highest output flame of any butane torch
- Separate Controls for Fuel and Air
- Flame temperature 1350°C
- Burning time per fill 200 min

Butajet

Microjet torch 423000

- Gives a precise and wind stable pin-point flame Ideal for melting/de-icing of snow and ice, lighting barbeques, candles and small heating works
- Automatic ignition
- Complete portability
- Fueled by butane lighter or included fuel cell
- Flame temperature 1300°C
- Burning time per fill 20 min

Turbo Lite torch 420001

- Gives an exact and wind stable pin-point flame ideal for de-icing of bicycle- and car locks, camping or as a cigarette lighter
- Automatic ignition
- Complete portability
- Flame lock child resistant
- Flame temperature 1300°C
- Burning time per fill 30 min

Electric ignition soldering kit 410001

- For applications such as automotive and truck repairs, TV- and radio repairs, jewelry repairs, electronics, air condition, shrinking and other heating jobs
- Automatic piezo ignition
- Portable multi function heat tool
- Flame temperature 1300°C

- Power range 30-100 Watt
- Burning time per fill 120 min

Premium soldering kit 412001

- Power range 30-125 Watt
- Visible fuel level
- Burning time per fill 210 min

Gardener

Heat away the weeds

CONVENIENT

ENVIRONMENTALLY FRIENDLY

Gardener

Heat away the weeds

- Convenient - Saves your knees and back
- Environmentally friendly - No chemicals
- Automatic piezo ignition - No matches needed

Gardener no.	223001	223101	223097
Gas Consumption, g/h	300	400	400
Length, mm	770	700	700
Weight, g	750	750	750
Connection	EU	Sievert	US

Cylinder/gas cartridge not included

Slowly sweep the burner about 5 cm above the weeds. The plant shall be heated, not burned. The heating causes the cell walls in the plant to burst and the plant dies of drying out. A correct heating can be checked by pressing a leaf between the fingertips. A dark green fingerprint shall then appear on the leaf.

Weed.

Heat it.

2-3 days later.

After 2-3 days the weeds have wilted completely - with just the need to sweep up and compost. The treatment is best carried out in spring and is most effective against small weeds. Small annual weeds die completely after one treatment. Grass, dandelion and other perennial weeds need repeated treatment throughout the growing season.

RESTORE

Grinding wheel dresser

Reconditioning grinding wheels

A worn or clogged grinding wheel seriously reduces its grinding ability. With a Sievert Grinding Wheel Dresser, the grinding wheel can be restored to almost new condition and large amount of money will be saved.

The sturdy and comfortable hardwood handle provides a stable but soft grip. The roller comprises complete discs of punched Swedish special steel with U-shaped teeth. Through a special method of hardening, the teeth have been given the correct hardness and toughness. Supporting heels on the dresser cover enable it to be placed precisely against the grinding wheel. The cover also provides protection for the face and hands against sparks and flying particles.

The choice of Sievert Grinding Wheel Dresser depends on the grain size, hardness and speed of the grinding wheel.

Art no.	Description	Diameter, mm
297304	Speed welding round	4 mm
297355	Speed welding round	5 mm
297335	Speed welding triangular	3,7 x 5,7 mm
297357	Speed welding triangular	5 x 7 mm
297360	Tacking	-

Pressure Rollers

Developed for perfect results

Silicone Pressure rollers

Silicone roller with ball bearings for overlap welding, screwed axis, ergonomical wooden handle for maximum pressure, bracketed on one side.

Art no.	Roller Size, mm	Weight, g	Model
297512	Ø 33 x 28	155g	Straight
297513	Ø 33 x 45	240g	Straight
297514	Ø 33 x 45	240g	Angle 45°
297515	Ø 33 x 90	350g	Straight

Steel Pressure Rollers

Heavy duty steel pressure roller for cold pressure welding, Two smooth running ball bearings, riveted axis, ergonomical wooden handle for maximum pressure, bracketed on one side for overlap welding.

Art no.	Roller Size, mm	Weight, g	Model
297531	Ø 40 x 40	490g	Straight
297532	Ø 40 x 60	625g	Straight

PTFE Pressure Rollers

PTFE roller for overlap welding of much harder and tougher membranes such as polyolefin. Two smooth running ball bearings, screwed axis, ergonomical wooden handle for maximum pressure, bracketed on one side.

Art no.	Roller Size, mm	Weight, g	Model
297521	Ø 33 x 28	165g	Straight
297522	Ø 33 x 45	365g	Straight

Metal Pressure Rollers

Extra thin metal pressure roller for PVC-sheets welding and flooring installation, enclosed smooth-running ball bearings, extra thin, convex metal roller, ergonomical wooden handle for maximum pressure.

Art no.	Roller Size, mm	Weight, g
297541	Ø 34 x 6	195g

Brass Pressure Rollers

Brass pressure roller, enclosed smooth-running ball bearings, extra thin, convex brass roller, ergonomical wooden handle for maximum pressure.

Art no.	Roller Size, mm	Weight, g
297542	Ø 28 x 6	145g

Seam tester

90° angled seam tester, ergonomical wooden handle, optimized tip.

Art no.	Length, mm	Weight, g
297551	250	100g

Scissors

NEW

Stainless steel scissor, thick blade, ergonomic plastic grip.

Art no.	Blade length, mm	Weight, gr.
297560	110	160g

Accessories kit

NEW

Art no.	293050

TW 5000

High Quality Welding Result

POWERFUL

EASY TO OPERATE

The Sievert TW 5000 was designed with the contractor in mind. It is the most versatile, reliable, powerful and easy to operate automatic hot-air welding machine available on the market.

The Sievert TW 5000 can weld any membrane, such as plastic, rubber and modified bitumen.

Sievert's long experience in making heating tools for the roofing industry together with new modern industrial design has created a truly professional and user friendly welding machine.

Four-wheel drive and belt system assures wrinkle-free welding

Powerful engine and efficient drive system allows climbing ability up to 30°

Separate free rolling wheels for easy transport

Easy to operate display unit. Digital display showing temperature, speed and incoming voltage

Runs on 400 V or 230 V

All electronics are made in accordance to highest industrial standard

Powerful fan for high-speed welding

Adjustable handle made of sturdy steel

Automatic start/stop sensor when the hot-air nozzle is engaged/disengaged

TW 5000

TW 5000 hot-air welding machine

Technical data TW 5000			
Temperature	40°C - 650°C fully adjustable	Cable length	90 cm
Speed	0 - 7m/min fully adjustable	Size	56 x 38 x 25 cm
Air flow	0 - 48 l/s fully adjustable	Weight (incl. 8kg)	30 kg
Display	Digital LED	Declaration of conformity	CE
Emission level	70 dB		

**All models
are delivered
in a sturdy
steel trans-
port box.**

Model 2990

- Overlap welding of PVC and similar roofing membranes

Plastic welding

Model 2991

- Overlap welding of modified bitumen and similar roofing membrane

Bitumen

Model 2993

- TW 5000 Wideweld, provides a wide nozzle for up 130 mm welding.

130 mm

LP gas

Information

Sievert on LP gas

Gaseous paraffins is the correct description for what we call LP gas. LP gas consists of the hydrocarbons propane and butane, or a mixture of the two. These gases are extracted from crude oil. LP gas or LPG stands for liquefied petroleum gas. At normal temperatures, LP gas is gaseous but is a liquid when under pressure. Propane must be distributed in steel cylinders that can withstand high pressure. Butane can be distributed in lighter gas cartridges.

LP gas and safety

Leaking LP gas is a fire hazard.
LP gas is heavier than air.
LP gas uses air during combustion.

There are primarily two things to think about to prevent accidents with LP gas. 1. Avoid leakages. 2. Ensure good ventilation. Leaking LP gas can ignite and cause a fire, or in the worst case, an explosion. The cylinder valve should always be closed when the cylinder is not in use. The cylinder should be stored upright and, if possible, at ground level since LP gas is heavier than air and can therefore accumulate in cellars, manholes etc. Good ventilation is important when working indoors as the flame consumes air. Lack of oxygen causes incomplete combustion, which produces carbon monoxide instead of carbon dioxide. Carbon monoxide is a treacherous and deadly gas.

LP gas and efficiency

Permits very high power outputs.
Energy content is high.
Fuel is easy to store and transport.

A large amount of fuel only occupies a small space and is therefore easy to store and transport. LP gas forms a combustible mixture with air when the proportion of gas is between 2 and 10 percent. When the gas changes from a liquid to a gaseous form, the volume increases by 250 times. In other words, the energy content is high. LP gas can be stored in its container almost indefinitely without the gas breaking down.

LP gas and the environment

LP gas is non-toxic and does not contain hazardous additives.
It does not contaminate air or water.

LP gas does not produce any hazardous combustion gases, just carbon dioxide and water vapor. The gas does not contaminate water, it does not produce soot, it is not corrosive and it does not cause corrosion to iron or other metals. It does not contain lead or heavy metals and is non-toxic. In other words, LP gas is an environmentally friendly fuel. The only additive is a strongly smelling substance that acts as a warning signal for leaking gas. Normally, LP gas has no smell.

LP gas and handling

Work in well-ventilated areas.
Avoid placing the LP gas cylinder near sources of heat.
Ensure that the cylinder is stored upright during transport.

You should regularly check valves and connectors for leakage. Remember also that good ventilation is important at areas where the gas is stored or used. Ventilation is also important to ensure effective combustion. Make sure that the cylinder is at ambient temperature when you begin working. If you are going to use the fuel at temperatures below zero Celsius, use propane instead as butane does not gasify at low temperatures.

LP gas and fire

Always extinguish LP gas fires with powder, never water.
Move LP gas cylinders to a safe place if there is a fire in the vicinity.
If possible, close the valve on the cylinder.

Steel cylinders are fitted with a safety valve that opens if the pressure increases too much. This can occur if there is a fire close to the cylinder. The valve stops the cylinder exploding. To guarantee the function of the safety valve, it is important that the LP gas cylinder is stored in a standing position. In addition, a closed valve stops unchecked gas flow if a hose should become damaged.

LP gas and equipment

Never allow an untrained person to use the equipment.
Only use special LP gas parts.
Be extra careful with valves and connectors.

Never use other valves, burners or hoses that those designed for use with LP gas. Sievert LP gas hose conforms to the EN 559 standard. The hose consists of an internal rubber layer that is LP gas-proof, armouring an external rubber layer that can withstand air and aging. All equipment shown in this product catalogue is manufactured of materials that withstand LP gas and is designed so that the risk for leakage is minimal.

LP gas and checks

Ensure that you have the correct equipment for the job. Make sure that you have tightened all valves and connectors. Regularly inspect the equipment and check that the system is sealed.

Read the instructions for use and follow the safety advice. Use soapy water or a special liquid for detecting leakages on valves and joints to find any leaks. LP gas hoses should be checked very carefully and changed if you see any changes. Bend the hoses and look for cracks in the rubber. Hoses exposed to sunlight with age quicker than those used indoors.

LP gas and storage

LP gas is not affected by long storage periods. Always disconnect equipment from the container. Store the cylinder in a well-ventilated area.

Avoiding storing LP gas cylinders in areas that are warm. Temperatures below zero Celsius are, however, perfectly safe for storage. Ensure that the ventilation is good. In principle, LP gas can be stored indefinitely in its container without the quality being affected. Remember to remove all connectors before storing the equipment. To empty the system of gas, close the valve on the LP gas cylinder. Then close any valves on the rest of the equipment. In this way, you will avoid LP gas spillage when you open the system again.

LP Gas

LP gas output from a cylinder

When LP gas turns from a liquid to a gas, heat is required which is taken from the liquid itself, from the container and from the surrounding air. LP gas and the bottle become cooler which reduces the pressure in the container. For larger burners, and especially during continuous use, a sufficient container size is necessary so that the burner can work at a constant power. When using larger burners or burners with high gas consumption, ensure the cylinder size is large enough to deliver the required gas, without significant temperature drop. Table below shows an example of the maximum quantity of gas possible to use during one hour for burners requiring 2 bar pressure. Conditions for this example are the following: gas – propane, cylinder size 11 kg, continuous gas use during one hour, temperature of air and cylinder.

Temperature	+20°C	0°C
Full cylinder 11 kg propane	3.8 kg	1.6 kg
Half cylinder 5.5 kg propane	1.9 kg	0.85 kg

For large gas burners you need to have big gas cylinders with enough gas or several cylinders linked together.

Temperature of the gas flame

Theoretically, LP gas has a maximum flame temperature of 1925 °C. In practice, this temperature is not reached when heating an object. The temperature achieved depends on the size of the object, how much heat is dispersed, the ability of the burner to transfer heat, the size of the burner and how long the object is heated. Therefore, the choice of burner depends on the job to be carried out.

LP gas and technical specifications

	Butane	Propane
Chemical formula	C ₄ H ₁₀	C ₃ H ₈
Density at 15°C	Heavier than air	Heavier than air
As gas	2.40 kg/m ³	1.85 kg/m ³
As liquid	0.58 kg/l	0.51 kg/l
Boiling point at atmospheric pressure	-2°C	-42°C
Gas pressure at -20°C	0	1.5 bar
Gas pressure at 0°C	0	4 bar
Gas pressure at +20°C	1.3 bar	7.5 bar
Energy content	49.5 MJ/kg 12.6 kWh/kg	50.4 MJ/kg 12.8 kWh/kg
Amount of air required for combustion	12.0 m ³ /kg	12.2 m ³ /kg
Maximum flame temperature with air	1925°C	1925°C
Combustion mixtures, volume-% gas in air	1.5 - 8.5%	2.1 - 9.5%

Melting points of soldering metals
